

Who is IntelliSys Aviation?

Named the New Brunswick Exporter of the Year, Top 10 Most Innovative Aviation & Aerospace Solution Providers 2018 and voted one of the Best Places To Work In Atlantic Canada, IntelliSys Aviation is the best-kept secret in the Maritimes.

IntelliSys is focused on providing airline passenger reservation and cargo management software to airlines of all sizes and business models, currently serving over 45 airlines from around the globe. IntelliSys boasts an open platform system that gives airlines the freedom to do more, bringing in maximum value and growth to their airlines.

Our team is passionate about helping our airline clients thrive, while enabling exceptional passenger experiences for air travellers worldwide.

We are currently looking to add a **Systems Engineer** to our growing team. The successful candidate will not only be a problem-solving ninja with the technical skills to succeed, but will also have the passion to be an intricate part of our company.

You:

- Crushed it in school and are proud of it (are a University or College Diploma Graduate)
- Look for challenging problems and elegant solutions
- Seek a high level of excellence in everything you do
- Are a self-starter, motivated and dedicated
- Are often called a perfectionist ...you don't know why others would waste their time doing things in a less than optimal manner
- Are the person friends and family look to for answers to hard problems
- Love your craft

We:

- Value your insights and intelligence more than your experience or background
- Love to ask "why not?" and "what is stopping us?"
- Make decisions based on data and evidence regardless of the presenter's job title
- Appreciate great questions
- Are constantly striving to improve
- Celebrate a great idea

- Have a tight-knit team who love to laugh and have fun together
- Put our airline customers first and have a deep appreciation for the aviation industry

We have big expectations for ourselves. We need amazing people like you to help bring out the best in us, and we promise to help bring out the best in you. Along the way we will work through problems together, provide constructive feedback and ensure that you have an understanding environment that you love coming to every day. We work hard but strive for a healthy work-life balance for all of our employees; offering an exceptional benefits program, free beer on Fridays, and a strong corporate culture with many team outings...who knows, you might even find yourself on a canoe trip!

Responsibilities

- Being a team player. No jerks allowed.
- Keeping our environments running with the best stability and performance possible.
NOTE: Millions of people will be relying on your work
- Digging into problems to get to the root causes
- Delivering more value than our competition at a lower cost
- Learning and growing every day
- Looking for ways to experiment to find the best option

Technology

We work with a deep software stack running in a multi-cloud environment. Our software is largely built on Microsoft technologies, but there is a growing list of components living outside of that and more to come in the future.

If you believe you are a good fit for a fast-paced and challenging work environment, please quote "**Systems Engineer**" in the subject line and submit your application to our Human Resource Department at careers@intelisysaviation.com

We thank all applicants for their interest, however, only those selected for an interview will be contacted.
