

Senior Developer - VB6 Specialist

ABOUT INTELISYS

InteliSys Aviation Systems, with headquarters in Canada and a local office in Ho Chi Minh City, is an established leader in airline passenger reservation and cargo management software with their ameliaRES and ameliaCARGO products. InteliSys' software is used by more than 40 airlines worldwide. InteliSys is looking for great people to join our team in Ho Chi Minh City.

If you are a smart hardworking person looking to join a great worldwide company, potential travel to Canada and grow your career, please read below and apply today.

JOB DESCRIPTION

We are looking for a Senior Software Developer with a minimum of two full years working with VB6 to join our operations and software development teams. The right candidate will have excellent investigation and optimization skills with a proven track record of delivering reliable solutions to complex problems. A holistic view of software development and operations is critical. The complete database environment and development lifecycle are always kept in mind.

We are looking for a team-oriented individual who loves to learn and share their knowledge and expertise with others. We require a person with excellent English verbal and written communication skills. Those skills must complement the ability to track down bottlenecks in operational environments and simplify complex functional and technical systems.

DUTIES AND RESPONSIBILITIES

- *Investigate, reproduce and resolve bugs. Navigation through all software layers (UI, application/business, and data tiers) is required.*
- *Follow established software development lifecycle processes precisely and consistently*
- *Provide timely communication to the entire team to prevent foreseeable obstacles*
- *Manage and report your time accurately*
- *Balance priorities to ensure efficient effort allocation*

SKILLS AND EXPERIENCE

- *A Bachelor's Degree (or equivalent training/experience) in Software/Computer/Database Engineering*
- *At least three years of experience with relational databases*
- *At least one year of experience writing stored procedures for relational databases*
- *Excellent verbal and written English*
- *At least three years of experience using issue tracking/project management software on a daily basis (e.g. JIRA, Bugzilla, TFS)*
- *At least two full years working in Visual Basic 6 as a primary programming language*
- *Fluency with COM and DCOM/COM+ technologies*
- *At least one year of experience working with projects leveraging COM/COM+ in conjunction with .NET*
- *At least 5 years of .NET development where C# was used as the programming language at least 30% of the time*
- *Working in a development team where consideration for deployability and testability were as important as writing working code*
- *At least one year using Agile development methodologies on a daily basis (e.g. Scrum, Kanban, Extreme Programming, etc.)*
- *Experience with scripting languages such as Powershell for automation of deployment tasks*
- *At least one year of full-time experience authoring tests in a unit testing framework (e.g. NUnit, xUnit.NET, MSTest, etc.)*
- *At least four years on a multidisciplinary team: working daily with SMEs, Analysts, Designers, and other development specialists*
- *At least five years performing daily work with version control systems*
- *At least one year of front-end web development*
- *At least one year of fat client development*
- *Fluency with multi-tier architectures and the ability to effectively communicate your understanding*
- *A demonstrated commitment to upgrade your technical skills over the course of your career*

The following are desirable skills and experience.

- *PowerShell scripting (three months or more)*
- *Experience working in a Continuous Integration/Delivery/Deployment environment and familiarity with DevOps practices (at least six months)*
- *Test case automation (at least six months)*
- *Deployment automation (at least three months)*
- *Comfort producing documentation in a collaborative document solution (e.g. Confluence, Mediawiki, etc.) (at least 3 months)*
- *Fluency with concepts within software telemetry*

- *Internationalization/Localization experience (at least three months)*
- *Technical writing/documentation (at least three months)*
- *Airline industry domain expertise (at least six months)*
- *Payment processing domain expertise (at least six months)*
- *E-commerce domain expertise (at least six months)*
- *PKI development experience (at least three months)*
- *Modern front-end frameworks/libraries: Angular, React, Vue.js (at least six months)*
- *UI/UX design (at least one year)*
- *Experience with public cloud providers (e.g. AWS, Azure, Google Cloud, etc.) (at least four months)*
- *Version control expertise with Git specifically (at least six months)*
- *RESTful API development (at least 3 months)*
 - *Experience with Postman*
 - *ASP.NET Web API 2*
